Primary 2

Student's Book

Term 1

Andrea Turner and Nicola Gardner

Foreword

This is a pivotal time in the history of the Ministry of Education and Technical Education (MOETE) in Egypt. We are embarking on the transformation of Egypt's K-12 education system (Education 2.0) starting in September 2018 with KG1, KG2 and Primary 1, continuing to be rolled out year after year until 2030. We are transforming the way in which students learn to prepare Egypt's youth to succeed in a future world that we cannot entirely imagine. The rapid technological advancement and disruptions to industries and the workplace requires MOETE to undergo a major configuration of when to learn and what to learn. The foundational skills of literacy, numeracy and digital literacy are the core. Education at a young age also needs to be multidisciplinary to broaden students' horizons, integrating the essential soft skills and competencies such as communication and critical thinking into the school curriculum. There must be joy in learning so that students are motivated to engage in lifelong learning throughout their lives keeping up and staying ahead of changes in the world.

Curriculum is not the end but the beginning of the important process of changing Egypt's education system. MOETE is very proud to present this new series of textbooks, *Connect Plus*, with the accompanying digital learning materials that capture its vision of the transformation journey. This is the result of much consultation, much thought and a lot of work. We have drawn on the best expertise and experience from national and international organizations and education professionals to support us in translating our vision into an innovative national curriculum framework and exciting and inspiring print and digital learning materials.

The MOETE extends its deep appreciation to its own Center for Curriculum and Instructional Materials Development (CCIMD) and specifically, the CCIMD Director and her amazing team. MOETE is also very grateful to the minister's senior advisors for curriculum and early childhood education. Our deep appreciation goes to Discovery Education, Nahdet Masr, Longman Egypt, UNICEF, UNESCO, World Bank Education Experts and UK Education Experts who, collectively, supported the development of Egypt's national curriculum framework. I also thank the Egyptian Faculty of Education professors who participated in reviewing the national curriculum framework. Finally, I thank each and every MOETE administrator in all MOETE sectors as well as the MOETE subject counsellors who participated in the process.

This transformation of Egypt's education system would not have been possible without the significant support of Egypt's current president, His Excellency President Abdel Fattah El-Sisi. Overhauling the education system is part of the president's vision of 'rebuilding the Egyptian citizen' and it is closely coordinated with the Ministries of Higher Education and Scientific Research, Culture, and Youth and Sports. Education 2.0 is only a part in a bigger national effort to propel Egypt to the ranks of developed countries and to ensure a great future to all of its citizens.

A Word from the Minister of Education and Technical Education

It is my great pleasure to celebrate this extraordinary moment in the history of Egypt where we launch a new education system designed to prepare a new Egyptian citizen proud of his Egyptian, Arab and African roots - a new citizen who is innovative, a critical thinker, able to understand and accept differences, competent in knowledge and life skills, able to learn for life and able to compete globally.

Egypt chose to invest in its new generations through building a transformative and modern education system consistent with international quality benchmarks. The new education system is designed to help our children and grandchildren enjoy a better future and to propel Egypt to the ranks of advanced countries in the near future. The transformation of the Egyptian citizen is Egypt's national project for the years to come and it is the only safeguard for a prosperous future.

The fulfillment of the Egyptian dream of transformation is indeed a joint responsibility among all of us, governmental institutions, parents, civil society, private sector and media institutions. Here, I would like to acknowledge the critical role of our beloved teachers who are the role models for our children and who are the cornerstone of the intended transformation.

I ask everyone of us to join hands towards this noble goal of transforming Egypt through education in order to restore Egyptian excellence, leadership and great civilization.

My warmest regards to our children who will begin this journey and my deepest respect and gratitude to our great teachers.

Dr. Tarek Galal Shawki

Minister of Education and Technical Education

the 1990s, the number of people with a diagnosis of schizophrenia has increased in the United Kingdom (Meltzer and Peckham 1998).

There is a growing awareness of the need to improve the lives of people with mental health problems. The United Kingdom has a long history of psychiatric hospitals, but in the 1960s and 1970s there was a growing awareness of the need to improve the lives of people with mental health problems. This led to a movement towards deinstitutionalization, with the aim of providing care in the community rather than in large psychiatric hospitals.

There is a growing awareness of the need to improve the lives of people with mental health problems. This has led to a movement towards deinstitutionalization, with the aim of providing care in the community rather than in large psychiatric hospitals. the 1990s, the number of people with a diagnosis of schizophrenia has increased in many countries (1).

There is a growing awareness of the need to improve the quality of life of people with schizophrenia. This has led to a focus on the development of psychosocial interventions, which aim to help people with schizophrenia to live more independently and to participate more fully in society (2). One of the key areas of focus is the development of self-help interventions, which can be used by people with schizophrenia to manage their symptoms and to improve their quality of life (3).

Self-help interventions can be defined as interventions that are designed to be used by people with schizophrenia to manage their symptoms and to improve their quality of life. They can be used in a variety of ways, including as a primary intervention, as an adjunct to other interventions, or as a means of relapse prevention (4). Self-help interventions can be delivered in a variety of ways, including through self-help manuals, audio cassettes, video, and computer-based programs (5).

There is a growing body of evidence to suggest that self-help interventions can be effective in helping people with schizophrenia to manage their symptoms and to improve their quality of life (6). For example, a meta-analysis of 10 studies found that self-help interventions were effective in reducing the risk of relapse in people with schizophrenia (7). Another meta-analysis found that self-help interventions were effective in improving the quality of life of people with schizophrenia (8).

There are a number of reasons why self-help interventions may be effective in helping people with schizophrenia to manage their symptoms and to improve their quality of life. One reason is that self-help interventions can be used by people with schizophrenia at their own pace and in their own homes (9). Another reason is that self-help interventions can be tailored to the needs of individual people with schizophrenia (10). Finally, self-help interventions can be used as a means of relapse prevention, which can help to reduce the risk of hospitalization and the need for medication (11).

There are a number of challenges associated with the development and implementation of self-help interventions for people with schizophrenia. One challenge is the need to ensure that the interventions are easy to use and understand (12). Another challenge is the need to ensure that the interventions are acceptable to people with schizophrenia (13). Finally, there is a need to ensure that the interventions are cost-effective (14).

Despite these challenges, there is a growing awareness of the need to develop self-help interventions for people with schizophrenia. This has led to a number of studies that have evaluated the effectiveness of self-help interventions in helping people with schizophrenia to manage their symptoms and to improve their quality of life (15).

I'm Sara. I'm seven years old. I like

I can fast. I can

the ball. My brother's name is Seif. He likes

..... . He doesn't like tennis.

Vocabulary: football, basketball, karate, swimming, tennis, team

At the Sports Club

1 Listen, read and guess the names

At the Sports Club

At the sports club,
We have lots of fun!
We play, we jump,
We skip, we run!

I play **football**.
I am number fifteen.
I wear a white shirt,
And my shorts are green.

I play **tennis**.
I have a **racket** to **hit**.
I hit the ball hard.
I like to stay fit!

I play **basketball**.
Can you guess my name?
I **throw** the ball in the basket,
And my team wins the game!

I **kick** the ball.

I **hit** the ball with
my **racket**.

I **throw** the ball.

2 Listen and check

- 1 Who throws the ball?
- 2 Who kicks the ball?
- 3 What does Hana hit the ball with?
- 4 Who plays basketball?

3 Circle the correct answer

- | | |
|----------|------------|
| Hana | Amira |
| Hany | Hana |
| her hand | her racket |
| Hana | Amira |

4 Sing

Vocabulary: kick, hit, throw, racket, ball

Language: This is my racket.

I (kick / hit / throw) the ball.

Make a survey

Which game can you play?

1 Make a class survey. Ask and answer

Can you play tennis?

Yes, I can.

Name	football	tennis	karate	basketball
Dina	x	✓		

2 Use the table to write sentences

1 Dina can

2

3

Reading

1 Listen and read. Then circle the correct answer

1

My name is Yasser. I can play football. I play in a team. I kick the ball. I run fast. It's fun!

2

My name is Jana. I can play basketball. I play in a team. I throw the ball. I put it in a basket. I run fast, too. It's fun!

- | | | |
|---------------------------------------|-----------|------------|
| 1 What does Jana play? | football | basketball |
| 2 Who plays football? | Yasser | Jana |
| 3 Why do Yasser and Jana play sports? | It's fun! | It's bad! |

2 Complete about yourself

I can play

This is me.

I can't

I play alone/in a team.
